

Squamish Highlands · single-tile threat diagnostics (~10 × 10 km, CWH zone)

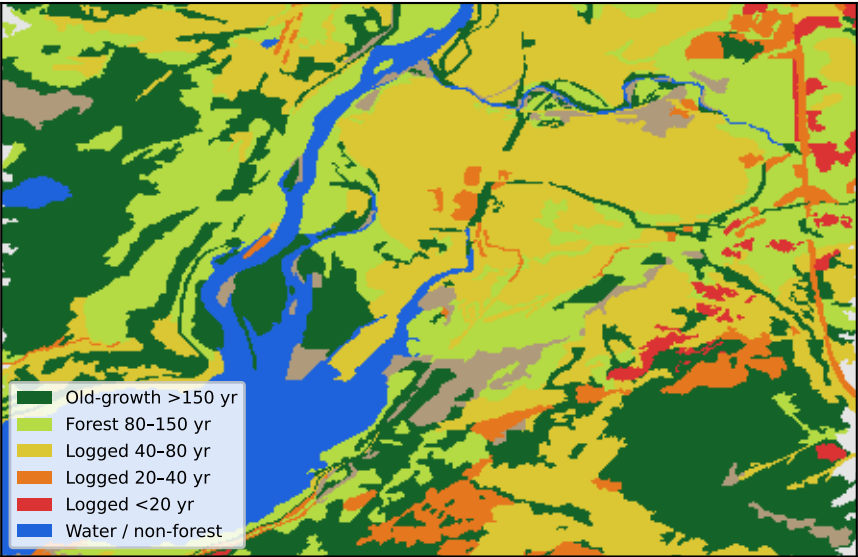

(a) Sentinel/AlphaEarth RGB context

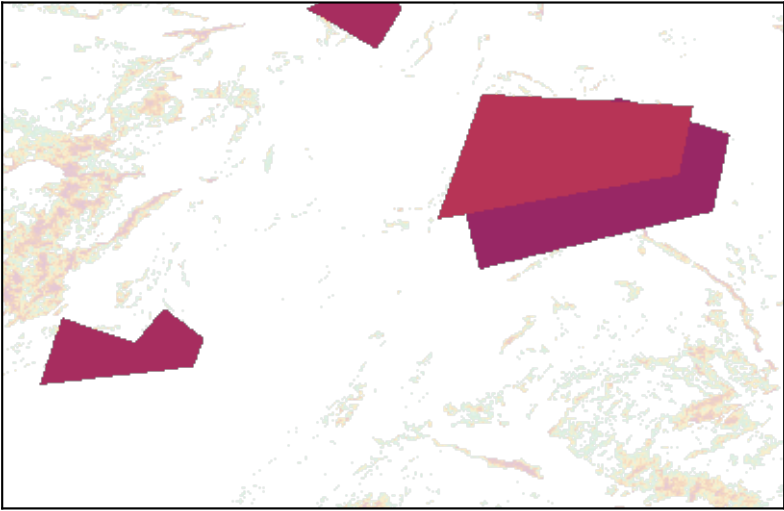

(b) Yew habitat probability (raw)
old-growth mass = 981 ha

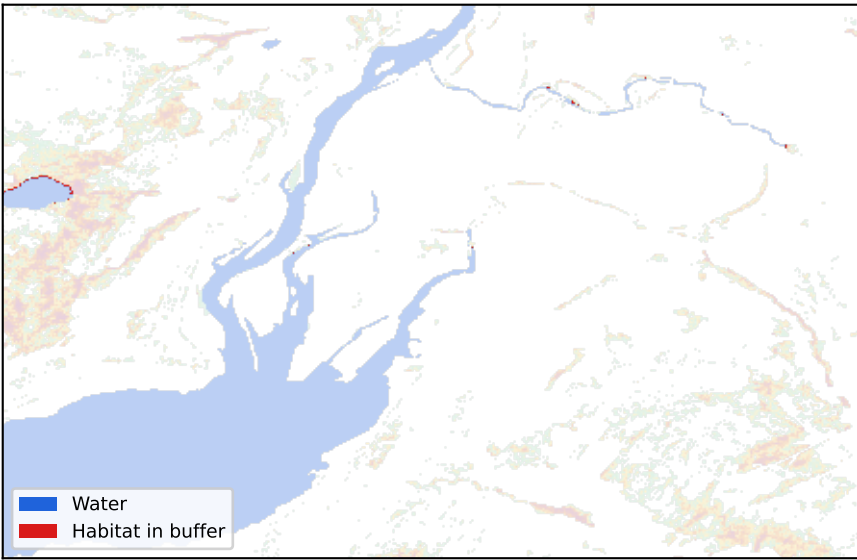

(c) VRI stand age (logging)
54% of tile logged <150 yr

(d) Historical fire perimeters
4 fire(s) intersect tile

(e) Riparian erosion risk (30 m buffer)
5 ha old-growth habitat at risk

(f) Protected areas
19 ha (3%) of habitat protected
